

## **XL-8346**

### **WATER-SOLUBLE NON-STAINING TEXTILE LUBRICANT**

**XL-8346** is a water-emulsifiable lubricant, designed to lubricate synthetic fibres, pins, and needles. The anti-static agents prevent the accumulation of static electricity in most fabrics, particularly in synthetics.

The specialised formula in **XL-8346** includes additives to reduce friction, residue, and carbonising, all of which will help reduce wear. **XL-8346** reduces the frequency of thread breakage, and improves overall productivity.

#### **ADVANTAGES**

- Prevents overheating
- Anti-static
- Emulsifies in water
- Energy-efficient
- Helps fibre cohesion
- High smoking point
